

Team Resource Utilization Report

Reporting Period: 02-Aug-2026 to 31-Aug-2026 | Generated via Automated Pipeline

TOTAL TASKS	EXPECTED HRS	ACTUAL HRS	NET VARIANCE	UTILIZATION
483	779.0	843.8	+64.75h	108.3%

Executive Narrative & AI Insights

During the period from August 2, 2026, to August 31, 2026, the team logged a total of 843.75 actual hours across 483 tasks against an expected baseline of 779.0 hours. This resulted in an overall utilization rate of 108.3% and an aggregate effort overrun of 64.75 hours. Work delivery was primarily driven by Support (44.3% of total actual hours) and New Development (31.94%), while client service demand was heavily concentrated in the JIWAJI and BHOJ accounts, which collectively accounted for nearly 44% of total resource effort. Governance metrics reveal significant individual workload imbalances across the six team members. Vandna Khare experienced critical over-utilization at 143.3% (+56.5 hours variance), driving the vast majority of the team's overage. Conversely, Amit Sondhiya operated below target capacity at 89.4% utilization (-11.5 hours variance). Addressing task distribution, scoping accuracy for New Development, and operational capacity planning will be required to normalize workload and mitigate burnout risks.

Key Governance Findings:

- Overall team utilization reached 108.3%, generating a total positive variance of +64.75 actual hours beyond the 779.0 planned hours across 483 tasks.
- Individual workload imbalance is severe: Vandna Khare flagrantly exceeded target capacity at 143.3% utilization (+56.5 hours variance), while Sakshi Patel reached 110.2% (+13.75 hours). In contrast, Amit Sondhiya ended under target at 89.4% utilization (-11.5 hours variance).
- New Development (+28.5 hours variance) and Support (+16.25 hours variance) were the primary drivers of total effort overruns, together accounting for 643.25 actual hours (76.2% of team effort).
- Service consumption was heavily skewed toward JIWAJI (204.0 actual hours, 24.18% share) and BHOJ (167.0 actual hours, 19.79% share), which combined for over 43.9% of total team bandwidth.

Strategic Recommendations:

- Rebalance current task assignments by shifting upcoming Support and Development tickets from over-utilized staff (Vandna Khare and Sakshi Patel) to under-utilized team members like Amit Sondhiya.
- Conduct a estimation audit on New Development and Change tasks to refine baseline effort expectations, as New Development generated the highest single work-type variance (+28.5 hours).
- Review service level agreements and resource allocation for high-demand services (JIWAJI and BHOJ) to ensure dedicated staffing aligns with actual consumption levels.
- Implement weekly capacity checks to catch rising variance flags early and prevent individual resource utilization from exceeding 110%.

Work-Type-wise Resource Utilization

Work Type	Tasks	Expected (h)	Actual (h)	Share %	Variance (h)
Support	261	357.5	373.8	44.3%	+16.2
New Development	118	241.0	269.5	31.9%	+28.5
Meeting	42	59.5	61.5	7.3%	+2.0
Issue	23	49.0	58.0	6.9%	+9.0
Enhancement	15	37.0	35.5	4.2%	-1.5

Change	9	14.5	24.5	2.9%	+10.0
Other	10	20.5	21.0	2.5%	+0.5
Total	483	779.0	843.8	100.0%	+64.8

Resource-wise Resource Utilization

Resource Name	Tasks	Expected	Actual	Variance	Util %	Done	WIP	Wait
Vandna Khare	87	130.5	187.0	+56.5	143.3%	65	22	0
Abhishek Rathore	91	167.0	171.0	+4.0	102.4%	69	13	10
Sakshi Patel	98	134.5	148.2	+13.8	110.2%	84	14	0
Sunil Shende	78	139.5	141.5	+2.0	101.4%	79	3	0
Priyanshu Shrivastava	49	99.5	99.5	0.0	100.0%	39	10	0
Amit Sondhiya	75	108.0	96.5	-11.5	89.4%	66	9	0

Most Overloaded Work & Governance Highlights

Category	Service / Resource	Actual Effort	Utilization	Governance Highlight
Service	JIWAJI	204.0 hrs	24.18%	Highest overall workload (24.18% of team effort); major demand footprint
Service	BHOJ	167.0 hrs	19.79%	Substantial ongoing effort (19.79% share); major operational commitment
Service	RALVV	118.0 hrs	13.99%	Notable footprint (118.0 hrs logged)
Resource	Vandna Khare	187.0 hrs	143.3%	Operating above nominal capacity (+56.5 hrs variance); risk of burnout
Resource	Sakshi Patel	148.25 hrs	110.2%	Operating above nominal capacity (+13.75 hrs variance); risk of burnout
