Executive Narrative & AI Insights

During the period from August 2, 2026, to August 31, 2026, the team logged an overall utilization rate of 108.3%, delivering 843.75 actual hours against an expected baseline of 779.0 hours across 483 tasks. This produced a total labor overrun of 64.75 hours. Work delivery was primarily driven by Support (373.75 actual hours, 44.3% share) and New Development (269.5 actual hours, 31.94% share), with New Development generating the single highest effort variance (+28.5 hours). Resource allocation reflects significant workload imbalance across the team. Vandna Khare experienced extreme utilization at 143.3% (+56.5 hours variance), followed by Sakshi Patel at 110.2% (+13.75 hours variance). Meanwhile, Amit Sondhiya operated below capacity at 89.4% utilization (-11.5 hours variance). Service line demand was concentrated heavily in JIWAJI and BHOJ, which collectively accounted for nearly 44% of total team hours.

Key Governance Findings:

- Overall team utilization reached 108.3%, exceeding planned capacity by 64.75 hours across 483 executed tasks.
- Support and New Development dominated effort allocation, representing 76.24% of total actual hours and driving +44.75 hours of combined positive variance.
- Critical resource allocation imbalance exists, with Vandna Khare heavily over-utilized at 143.3% (+56.5 hours) while Amit Sondhiya remained underutilized at 89.4% (-11.5 hours).
- Change work types experienced high proportional scope expansion, consuming 24.5 actual hours against an expected 14.5 hours (+68.9.0% overrun).
- Service output was heavily weighted toward JIWAJI (204.0 actual hours, 24.18%) and BHOJ (167.0 actual hours, 19.79%), consuming 43.97% of total team bandwidth.

Strategic Recommendations:

- Rebalance upcoming task assignments by redistributing support and development work from over-capacity personnel (Vandna Khare and Sakshi Patel) to underutilized team members (Amit Sondhiya).
- Calibrate scoping and estimation guidelines for New Development and Change work types to prevent chronic effort overruns.
- Assess dedicated staffing allocations for top-tier service demands (JIWAJI and BHOJ) to ensure adequate resourcing without straining shared team capacity.
- Implement governance check-ins for team members exceeding 110% utilization to mitigate burnout risk and maintain quality standards.
